Thanks. I just skimmed through a very small part of the document, but its clear to me quite a number of "resolved" issues will need to be re-opened. My fundamental concern at this point is that no one seems clear on what the dangerous waste management units are or are not, and what the scope of the dangerous waste permit requirements will be.

That and no set of monitoring wells even close to being acceptable at the point of compliance is in place.....

Can you open this? If you can, open and then file in your LLBG folder.
